Team management, development and communication of a vision, and event management for young people

Physical activities: Basketball, Running and Fitness

Cultural/artistic activities: Reading, Piano, Music production

Steve Benjamin

Student in Media Engineering at HEIG-VD, I am motivated, rigorous and creative, with a strong interest in interface design and user experience (UX/UI) as well as web and mobile development. My background combines interaction design (Figma), programming and web development skills with hands-on experience in team management and event organisation. I am looking for a Bachelor-level job allowing me to combine UX/UI design with the development of a digital solution, in a stimulating environment where I can continue to learn and contribute actively.

Academic and personal projects

May 2026
HEIG-VD, Yverdon-les-Bains

Platform donnons.ch - Grade: 6/6

- Team work on a charitable project (blood donation)
- Implementation of the site from UX/UI mockups, for a real mandate with the University Hospitals of Geneva (HUG)
- Back-end development: management of the site's database and application logic

Sept. 2024 - Present

Websites developed for personal use

- Independent design and development of four websites for personal, association and event purposes

Professional experience

Dec. 2023 - Present
Global Leadership Geneva-Bern (GLGB), Geneva
